

DUKE UNIVERSITY

Project Tracker for Institutional Approval

Dr. Geeta Swamy

Haywood Brown, MD Distinguished Professor of Women's Health
Associate Vice President for Research
Vice Dean for Scientific Integrity

Funding provided by the Duke CTSA grant UL1TR002553 & the Duke University School of Medicine

**Duke Clinical
& Translational
Science Institute**

Equity in Science, Medicine, and Health | ctsi.duke.edu

OVERVIEW

Problem

The Clinical Trial Institutional Approval process is complex, involving numerous offices, overlapping workflows, and multiple different systems.

Overall Aims & Scope

- Provide transparency into Duke's process
- Reduce timelines in main three areas of startup:
 - IRB approval
 - Contract execution
 - Billing/Calendar setup
- Focus initially on industry-funded clinical trials, but plan to expand in the future

Methods

Partnered process owners, investigators, research teams, and IT developers through a series of focus groups and working sessions during discovery and development.

DISCOVERY

Audience

Engagement with Clinical Research Study Teams and Research Administrators revealed common needs with a slightly different scope:

SIMILARITIES

- Hindered by data captured across multiple systems.
- Limited understanding of the entire process.
- Absence of reliable, widely accessible indicators for delays or outstanding requirements.

DIFFERENCES

- Study Teams interested in the progress of individual projects.
- Research Administrators needed an aggregate view of start-up metrics across a unit over time.

IMPLEMENTATION

Solution

Project Tracker system accessible via Duke's [myRESEARCHhome](#) portal comprised of 2 main components:

Tableau Metrics Dashboard

- Retrospective view of data across units
- Primarily for Research Administrators

Project Status Tracker

- Status information for a project awaiting approval
- Primarily for Study Teams

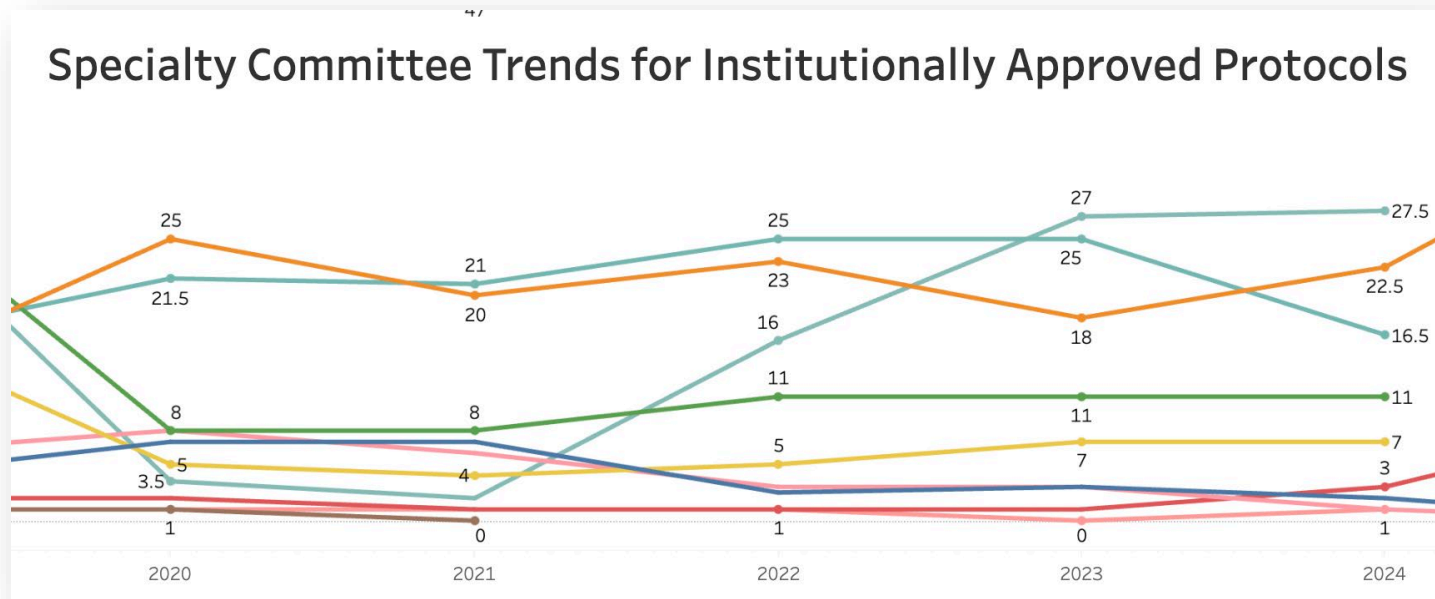

Both tools leverage the same defined milestones, mapped application variables, and combined data source. Study Teams and Research Administrators can access both tools.

TABLEAU METRICS DASHBOARD

Consolidate retrospective data from multiple systems

Visualize milestone time to completion across a unit

Indicate areas of delay for strategic response

Awaiting Institutional Approval

Percent of Studies waiting for Institutional Approval

- 60 Days or Less
- 61 to 85 Days
- 86 to 120 Days
- 121 to 150 Days
- 151 to 180 Days
- Over 180 Days

TABLEAU METRICS DASHBOARD

Consolidate retrospective data from multiple systems

Visualize milestone time to completion across a unit

Indicate areas of delay for strategic response

Institutionally Approved Studies by Fiscal Year

270

Approved Within 120 Days
7.04%

Median Days for Approval
267

Minimum Days for Approval
37

Maximum Days for Approval
1,202

Fiscal Year	CRU/Primary Management Group	Oncore Financials
FY 2024	(All)	Yes
Quarter	Division	Investigator Initiated
(All)	(All)	(All)
Month		
(All)

Institutional Approval

90 Days or Less
91 to 120 Days
121 to 150 Days
151 to 180 Days
Over 180 Days

	OnCore Range	OnCore Median	OnCore 90 Day Target		iRIS Range	iRIS Median	iRIS 90 Day Target		Innovate Range	Innovate Median	Innovate 90 Day Target
Step 1: Protocol Succeed	0 - 432	0	0								
Step 2: Draft Sponsor Budget Submitted	-32 - 544	12	7								
Step 3: Schedule Study Initiation Meeting	-19 - 123	1	1	Step 1: Submitted in iRIS	0 - 683	71	7	Step 1: Agreement Intake	-8 - 517	27	0
Step 4: Calendar Creation	00 - 40	12	7								

PROJECT STATUS TRACKER

Consolidate status info from multiple systems

Visualize the current status of my project

Indicate steps requiring study team action

CONTRACTS (INNOVATE)

BUDGET / CALENDAR (ONCORE)

IRB PROTOCOL (IRIS)

SPECIALTY COMMITTEES

- Pathology**
Completed 01/08/2024
- Pregnancy**
Completed 01/10/2024
- Protocol Review and Monitoring Committee**
Completed 01/08/2024

How did we find this info before?

1. Contract System 3 steps
2. CTMS (Budget/Cal.) 6 steps
3. IRB System 5 steps

14 total steps across 3 systems + emails between 3-4 people
