

COLLABORATIVE CARE FOR CHRONIC PAIN IN PRIMARY CARE

Data Sharing

What We Can Access

Type of Data	Baseline	Follow-up
Patient level		
ID (MHRN, name and contact info)	X	X
Demographic information	X	X
Relevant medical characteristics / comorbidities	X	X
Health care utilization	X	X
Medication use (opioids in MEQ, benzos)	X	X
PRO (BPI/PEGS, patient satisfaction)	X	X
Provider level		
Provider ID/Name/Eligible paneled patients	X	X
Demographic information & med specialty	X	X
Pain prescribing/referral practices	X	X
Cluster level		
Cluster ID	X	X
Clinic ID	X	X
Health Plan Region / Site	X	X

What We Need for Analysis

Type of Data	Baseline	Follow-up
Patient level		
Unique patient identifier (linkable to HRN)	X	
Treatment assignment	X	
Demographic information	X	
Relevant medical characteristics / comorbidities	X	
Health care utilization	X	X
Medication use (opioids in MEQ, benzos)	X	X
PRO (BPI/PEGS, patient satisfaction)	X	X
Cluster level (including PCP information)		
Mean demographic info & med specialty	X	
Mean pain prescribing/referral practices	X	
Cluster ID	X	X
Clinic ID	X	X
Health Plan Region / Site	X	X

PPACT Trial: What we can share

(via unsupervised data archive)

- Goal is to share all of the information needed to replicate the results in our publications – certainly those in our main outcomes paper
- Some sensitivity on the part of the regions about releasing data that would allow one to specifically identify which region is which
- We will likely only share some data (e.g. race, any region specific information) in aggregate form ... enough for someone to present a characteristics of the sample table for a paper

What we can share

Type of Data	Baseline	Follow-up
Patient level		
Anonymous patient ID	X	--
Treatment assignment	X	
Relevant medical characteristics / comorbidities	X	--
Demographic information	X (potentially Winsorized or, in some cases, in tabular form only)	--
Health care utilization used for analysis	X (with time since rand replacing dates)	X (with time since rand replacing dates)
Medication use (opioids in MEQ, benzos)	X (with time since rand replacing dates)	X (with time since rand replacing dates)
PRO (BPI/PEGS, patient satisfaction)	X (with time since rand replacing dates)	X (with time since rand replacing dates)
Cluster level (including PCP information)		
PCP demographic info & med specialty	Aggregate by condition -- tables only	--
PCP pain prescribing/referral practices	Aggregate by condition -- tables only	Aggregate by condition -- tables only
Cluster ID	X	--
Likely a combined region/clinic indicator	X	--
