

Data and Resource Sharing Checklist

Background

All NIH Collaboratory Trials will be expected to review the attached checklist as part of the onboarding process so they understand what will be expected. They will complete the checklist at closeout.

As part of the NIH Pragmatic Trials Collaboratory's commitment to sharing, all its trials are expected to share data and resources, such as protocols, phenotypes, videos, training materials, consent documents, and recruitment materials. We recommend that elements of a final data sharing package include the items listed in the checklist below. If an element will not be included in the data sharing package, please provide a brief explanation for the omission. Resources can be housed in the [NIH Collaboratory Knowledge Repository](#), in another repository (eg, GitHub), or on a study website. We will link to the materials from the Living Textbook on each trial's webpage and through a separate Data and Resource Sharing section. To request posting of materials to the Knowledge Repository, contact nih-collaboratory@duke.edu.

Note: There will not be a dedicated space on the NIH Collaboratory website for posting analytic datasets; rather, we will post a hyperlink to the data sharing repository chosen by each trial. In the accompanying Data Sharing Information Document, the Electronic Health Records Core provides a partial list of existing data sharing platforms. The Data Sharing Information Document also contains information on data sharing requirements for the NIH Pragmatic Trials Collaboratory, NIH, and medical journals; information on data sharing mechanisms and platforms; and examples from the NIH Collaboratory Trials.

Data and Resource Sharing Checklist – Part 1

1. Trial information

Trial name and acronym: Fibromyalgia TENS in Physical Therapy Study (FM-TIPS)

Checklist completed by: Kathleen Sluka

Date: 04/28/2026

Link to ClinicalTrials.gov registration: <https://clinicaltrials.gov/study/NCT04683042>

Link to trial website: Closed

Data and Resource Sharing Checklist – Part 2

2. Resource locations		
Item	Provide hyperlink or indicate if item will be stored in the Knowledge Repository	If item will not be shared, please provide a brief explanation for the omission
Publications/dissemination		
Link to study design paper or protocol paper	Post et al (PMID: 36036838)	
Link to main outcome paper	Dailey et al (PMID: 41893844)	
Link to other trial-related publications	All FM-TIPS publications	
Materials used to communicate trial results to participants (such as plain-language summaries)	News release	
Study tools		
Final version of protocol, including summary of changes	FM-TIPS protocol	
Consent documents or description of consent process	Vance et al (PMID: 40979091)	
Tools for sites (such as toolkits, checklists, instruction sheets, and clinician-facing materials)	FM-TIPS clinician and site materials	
Participant-facing materials (such as videos, flyers, and handouts)	FM-TIPS participant materials	
Computable phenotypes for outcome measures	Not applicable	Not collected in EHR
Computable phenotypes for inclusion/exclusion criteria	Not applicable	Not collected in EHR
Code for generating variables in the analytic dataset from standard sources	Not applicable	
Datasets and documentation		
Annotated data collection forms	FM-TIPS Data Collection Forms	
Link to public use dataset	openICPSR	
Data dictionary (PROC CONTENTS) for public use dataset	openICPSR	
Other resources
