Computable phenotypes for the inclusion/exclusion criteria	<a href="https://theclearcenter.org/studies/lire-trial/">https://theclearcenter.org/studies/lire-trial/</a>	
Code for generating variables in the analytic dataset from standard sources	Our sites did not supply us (the UW DCC) with the source code for extracting the analytical dataset from their EMRs despite repeated requests. Thus we do not have the code for generating the variables from the EMR.	
<b>Datasets and documentation</b>		
Annotated data collection forms		N/A, all data was passively collected via EMRs
