Consent documents or consent process	PainResearch/PPACT GitHub public repository: https://github.com/PainResearch/PPACT	
Computable phenotypes for outcome measures	PainResearch/PPACT GitHub public repository (Select variables): https://github.com/PainResearch/PPACT	
Computable phenotypes for the inclusion/ exclusion criteria		We explain in the main outcomes and protocol papers how inclusion /exclusion criteria were defined but do not provide code as it is specific to KP electronic health and administrative records.
Code for generating variables in the analytic dataset from standard sources		We explain in the main outcomes and protocol papers how variables were generated but do not provide code as it is specific to KP electronic health and administrative records.
